

DHIBAKARAN R

Developer ~ Programmer

SUMMARY

Highly motivated and newly graduated web developer with a solid foundation in both front-end and back-end technologies. Skilled in HTML, CSS, JavaScript, and ReactJS for robust front-end development, complemented by foundational knowledge in Core Java and SQL for server-side programming. Proficient in using Bootstrap for responsive design and experienced in handling JSON for seamless data integration. Eager to apply theoretical knowledge and technical skills in a real-world setting, aiming to contribute effectively to a dynamic team and create impactful web applications.

2017 - 2018	SSLC (CLASS X) K V S HR SEC SCHOOL, Virudhunagar	81.6%

PROJECT

Frontend	Slack-Clone The Slack clone site represents a duplication of the original Slack platform. My Slack clone project was constructed using HTML, CSS, and JavaScript. It serves as a template mimicking the user interface (UI) of the authentic site. The primary objective of developing this Slack clone was to enhance my frontend skills in CSS and JavaScript.	https://dhibakaran-r.github.io/my-slack-clone/
React	Simple Todo This project involves a simple, user-friendly to-do list application developed using ReactJS. The application allows users to manage their daily tasks efficiently, with an intuitive interface designed to enhance productivity. Key features of the application include the ability to add new tasks, mark tasks as complete, and delete tasks from the list.	https://dhibakaran-r.github.io/simple-todo/
